

2010 PRODUCTION

more than a hook !

M **CERLIANI**
ITALY - Shuttles - Hooks & Bobbin Cases

From the library of: Superior Sewing Machine & Supply, Inc. **January 2010**

Since its foundation **CM Cerliani** has always made Customer Service a business philosophy, numerous specific requests of sewing machines manufacturers and end-users around the world have been developed over the years by our Technical Department.

The hook noisiness has always been a very important factor in the evaluation of a high quality hook, but becomes a real necessity in some specific fields of application.

The specific demand of some of the largest manufacturers of quilting machines in the world, gave way for study of what is today the most recent **CM Cerliani** Patent:

THE NOISELESS HOOK!

The specific implementation of the hook, thanks to special magnets, significantly reduces the vibrations of the basket, the main cause of noise.

Noiseless Hook...

Noiseless Hooks...for quieter sewing!

Ask for this feature as "L" version hook

Italian Pat.: MI2008A002105 / European Pat.: 09276587.5 /
USA Pat. Pend.: 12/625.616 / China App. 200910226595.1 / etc.

CERLIANI introduces Hooks, Bobbin cases and Shuttles exclusively of our own production. For their fabrication we guarantee the use of quality choice materials and the constant precision in each phase of manufacturing, so as to insure that each piece will function perfectly as to the smooth sliding, quietness and long durability.

Our technical expertise if requested, can be used for the design and machining of special parts for specific technical requirements. For these reasons our special attention to quality becomes guarantee of the effective economy of the products.

Product line description

	CB Shuttle	Horizontal Rotary Hook	Vertical Rotary Hook
KH Hook to use with bobbin case/cap			
	+	+	+
KP Bobbin case/Cap			
	=	=	=
KK Hook to use with bobbin case/cap complete with bobbin case/cap			
KL Complete capless hook (hook with drop-in bobbin case)			

Item list (Reader's guidance)

Type of CM Article (see previous page)

- KK** = Hook to use with bobbin case/cap complete with bobbin case/cap
- KH** = Hook to use with bobbin case/cap
- KL** = Complete capless hook (hook with drop-in bobbin case)
- KP** = Bobbin case/Cap

Type of gib (only for the rotary hooks):

- Short gib (A TYPE):** for sewing heavy materials.
- Full gib (B TYPE):** for general sewing from light to heavy materials.
- Shorten full gib (B TYPE):** It is a little bit shorter than the full gib.
- Tacking gib (C TYPE):** for sewing medium and light materials.
- Jam proof gib (D TYPE):** this gib is fitted to our jam proof range of hooks (our exclusive patent for a long time). It is connected to the hook body by three screws and three coil springs. If the sewing thread gets caught in the raceway the special mechanism allows the thread to get out without having to remove or dismantle the hook.

Diameter of hole/shaft of the CM Article (HOOK only), measured in mm

Type of bobbin braking system (Bobbin Case/Cap only) is:

- MF** = Bobbin Case with adjustable no backlash spring.
- NBL** = Bobbin Case with no-backlash spring.
- Magnet** = Bobbin Case with magnet to brake the bobbin.
- - = Bobbin Case without any NBL/braking system of the bobbin.

Relation between hook point and needle passing window:

- FA** = The hook point is at the same level as the bottom of the needle passing window. FA is suited for needles with thickness 70 through 100 (metric, corresponding to American Singer sizes 10 through 16) and is used for all generic stitching on normal fabrics.
- FB** = The hook point is higher than the bottom of the needle passing window. FB is suited for needles with a very deep groove, such as Singer MR, Schmetz SERV 7 or Groz-Beckert SAN as well also for needles with thickness 120 through 160 (metric, corresponding to American Singer sizes 19 through 23).

CM Cerliani special coating for HEAVY DUTY

The research made by **CM Cerliani** through the Years, has involved countless suppliers, specialists, several Italian and foreign Universities and a strict cooperation with the most important sewing machines manufacturers Worldwide.

Among the best-achieved results only those few have been selected for the commercialization, which presented the best price/performance ratio.

Further **CM Cerliani** has chosen to back diversified solutions on the basis of the different market segment requirements.

The special coating presented in the following data sheet, has been specially developed for very heavy sewing:

DC 10	
glossy black coating on the hook body, gib and basket	
PROPERTIES	
PERFORMANCES	
LUBRICATION	
APPLICATION FIELDS	
PROPERTIES	
<ul style="list-style-type: none"> - extreme high hardness (3000 HV) - very thin coating thickness (3 µm) - uniform structure 	
<ul style="list-style-type: none"> - dry sewing up to 4000 stitches per minute - low friction coefficient - extremely high wear-resistance of the whole hook through coating both race and hook point - very long service life (effect is even more evident when abrasive threads are used) - proven reliability 	
<ul style="list-style-type: none"> - not necessary within the indicated conditions. If present, it can enhance the performances of endurance and smoothness 	
<ul style="list-style-type: none"> - <u>very heavy sewing</u> and in the presence of very abrasive threads - where there are problems of great wear also on the point of the hook - where dry sewing at high speed is required 	

CM Cerliani: the hook technology lives here!

CM Cerliani special coating for EMBROIDERY

Since years **CM Cerliani** is engaged in constant research for new material and coatings that permit to improve further the performances of the hook.

The research made by **CM Cerliani** through the Years, has involved countless suppliers, specialists, several Italian and foreign Universities and a strict cooperation with the most important embroidery machines manufacturers Worldwide.

Among the best-achieved results only those few have been selected for the commercialization, which presented the best price/performance ratio.

Further **CM Cerliani** has chosen to back diversified solutions on the basis of the different market segment requirements.

The special coating presented in the following data sheet, has been specially developed for the embroidery field:

FINE ADJUSTMENT SYSTEM OF THE NEEDLE GUARD ON VERTICAL ROTARY HOOKS

It is well known that lock stitching is created when the hook point grazes the needle, and catches the loop formed by the needle thread.

The innovative idea of the **CM Cerliani** patent produces a fine adjustment of the peripheral needle guard fastened with only two screws to the hook, without the necessity of the third screw for the mere adjustment function and thus applicable on all existing vertical hooks. Furthermore, the patented method turns out to be simpler and more economic, needing one less screw than the known system and allowing the adjustment of the needle guard directly on the sewing machine.

The needle guard, bent naturally inwards, is forced outwards by unscrewing the adjusting screw placed between the fastening screw and the point of the needle guard in correspondence with the hook point, thus obtaining the necessary adjustment without need to take off the hook.

The innovation produced by this patent allows the fitters and technical assemblers to adjust with precision the needle guard through a simple cheap and reliable operation.

CM Cerliani: we invent.... the others try to follow us!
