

Introduction to our new product lines:

- **Rulers**
- **Tagging Guns & Needles**
- **Fasteners**
- **Safety Pins**
- **Pins**
- **Hand Sewing Needles**

Presented by *Superior*

General Uses for Pins

- **Traditional Safety Pins**

- Used to fasten 2 pieces of fabric together
- Used to hold embroidery in place
- Used to patch torn or damaged clothing
- Perfect for diapers, as the safety clasp prevents the baby from being jabbed
- Used as a temporary button or zipper
- Used in thousands of other household, craft and industrial applications

- **Black Safety Pins**

- Perfect for emergency repairs without being detected on dark fabrics
- Can be used in thousands of other household, craft and industrial applications
- Great for attaching hunting badges

- **Coilless Pins**

- Have no coil to wrap around or snag delicate fabrics
- Used in creating fashion accessories
- Used to place-mark on knitting and crocheting
- Used to hold appliqué in place on delicate fabrics

- **Kiltie Pins**

- Used to hold skirts and kilts closed
- Used as shawl pins
- Used as horse blanket pins
- Used in creating fashion accessories

- **Bank Pins**

- Used when working with heavyweight material
- Used in model assembly
- Used in thousands of other household, craft and industrial applications

- **Dressmaker Pins**

- Used when working with medium to lightweight materials
- Used to place Appliqué, sequins or trim
- Used in thousands of other household, craft and industrial applications

- **Black Bank Pins**

- Used when working on fine fabrics
- Used in Entomology
- Used in Taxidermy

- **T-Pins**

- Used to hold hefty upholstery and outdoor fabric in place
- Used in model assembly
- Artist supplies

- **Laundry Pins / Net Pins**

- Perfect for keeping your mesh laundry bag closed and garments inside
- Used as horse blanket pins

- **Marking Pins**

- Used for identification on Items such as:
 - Locker I.D.s
 - Swim badges
 - Key holders

Quality Specifications

- **Safety Pins** are constructed using either hardened brass or high carbon steel, with a nickel or gilt plating
 - These coatings strengthen the safety pin and help protect against rust and corrosion
 - Nickel plating results in a silver colored finish
 - Gilt plating results in a gold colored finish
- **Black Safety Pins** are constructed using either hardened brass or steel which is then specially treated to give the pins a black matte finish
 - The oxidation process makes these safety pins rust resistant
- **Coilless Safety Pins** are constructed using either hardened brass or high carbon steel, with a nickel or gilt plating
 - These coatings strengthen the safety pin against rust and corrosion
 - Nickel plating results in a silver colored finish
 - Gilt plating results in a gold colored finish
- **Kiltie Pins** are constructed using hardened steel, with a nickel plating or gilt plating
 - Nickel plating results in a silver colored finish
 - Gilt plating results in a gold colored finish
 - This coating makes these pins highly resistant to corrosion and oxidation
- **Laundry Bag / Net Pins** are constructed using stainless steel wire, with a nickel plating
 - These pins have safety blunted points
 - Used to secure mesh laundry bags
- **Marking Pins** are constructed using stainless steel
 - The stainless steel construction makes these pins very long lasting and resistant to corrosion
 - They are available in three shapes: Mushroom, Flared, Standard

Quality Specifications (continued)

- **Bank Pins** are constructed using hardened steel, with a nickel plating
 - Nickel plating results in a silver colored finish
 - This coating makes these pins highly resistant to corrosion and oxidation
 - Heavy gauge steel
 - Large rounded heads
- **Dressmaker Pins** are constructed using hardened steel, with a nickel plating
 - Nickel plating results in a silver colored finish
 - This coating makes these pins highly resistant to corrosion and oxidation
 - Medium gauge steel
 - Large rounded heads
- **Black Bank Pins** are constructed using hardened steel, which is double-coated with black enamel
 - The black enamel makes these pins rust resistant
 - Large rounded heads
- **T-Pins** are constructed using a steel inner core, with a nickel plating for rust resistance and fast, effortless insertion
 - Nickel plating results in a silver colored finish
 - Each T-pin features a T-bar head making it easier to grasp and see
 - The sharp point penetrates even the toughest surface without bending or breaking
 - The steel inner core helps keep the point sharp
 - Closed “T” head eliminates snagging fabrics

Pin Code Explanation Charts

You will not be able to determine the composition of a pin by its outward appearance. To assist you, please refer to the charts below. By understanding the coding used in the pin part number, you will always be able to select the right pin for your needs..

Lance®

Hand Sewing Needles

**CAREFULLY CRAFTED OF CARBON STEEL
AND FULLY NICKEL PLATED**

** Made to European Needle Specifications*

Lance® Hand Sewing Needles

- **Sharps Needles** are medium length needles. They are the most popular needle for general hand sewing. The # 12 Sharps are also used by tattoo artists in applying tattoos. # 2, 3 & 4 are suitable for medium to heavy fabrics. # 5, 6, 7, 8, 9 & 10 are suitable for light to medium fabrics. # 11 & 12 are suitable for fine fabrics or creating small delicate stitches.
 - Sold 40 packs of 25 needles = 1000 needles
- **Beading Needles** are very fine and long needles, with long eyes. These needles are suitable for stringing beads, pearls and sequins anything requiring a thin needle. Beading needles are ideal when attaching beads to a fabric that already have embroidery. Only available in sizes 10 and 12.
 - Sold 40 packs of 25 needles = 1000 needles
- **Darning Needles (cotton) # 1-12** are long needles with long eyes and sharp points. They are used for mending, darning using cotton or yarn, basting and layering fabrics together.
 - Sold 40 packs of 25 needles = 1000 needles
- **Crewel (Embroidery) Needles** are identical in length and thickness to Sharps but have a longer eye for easier threading when using multiple strands of thread. Because of their large eye, these needles are ideal for people who have difficulty seeing the eye of a needle.
 - Sold 40 packs of 25 needles = 1000 needles

Lance® Beading Needles

Lance®

- Aluminum Rulers
- Curves
- L-Squares
- T-Squares
- Triangles

Quality Specifications

Lance® anodized aluminum, scratch-resistant measuring tools are precision made using the highest quality materials and the finest workmanship to guarantee smooth, clean work edges and easily-read measurements. The accuracy and clarity of Lance® calibrations meet the highest standards in the industry.

- **Curves** are designed to draw the numerous contours of the human form.
 - **Hip Curves:** Calibrations are on one edge, on both sides. Patternmakers, designers and tailors alike reach for this tool to measure or draw hipline, trouser inseam, lapels, sleeves, skirt seams, etc.
 - **French Curves:** Calibrations are on one edge, on both sides. Used to form arm hole curves. These tools complement the Hip Curve by adding the various curves formerly found only in a Burmester set.
- **T-Squares** are available in lengths from 12" to 72" and made of standard or heavy duty gauge aluminum. Calibrations are in 8ths and 16ths of an inch on the blade, and in 8ths of an inch on the head. The T-Square heads are made from ABS plastic for the greatest durability. The blue standard head is 9" long. The Green heavy duty head is 16" long.
- **Triangles** are excellent tools for commercial artists, draftsmen and hobbyist. They are available in angles of 30°/60°/90° or 45°/45°/90°, and in lengths from 6" to 14". They are calibrated in 16ths of an inch on one edge, one side. Each triangle has 20 or 26 circular template holes, depending on its size. The diameter of the circular template holes ranges from 1/32" to 1 3/8".
- **Straight Edge Rulers** are universally used tools and come in the following configurations:
 - **Inches:** Calibrations are on two edges in 16ths and 8ths on one side.
 - **Inches and Centimeters:** Calibrations are on two edges, on one side. Millimeters to centimeters on the top edge. Inches in 16ths on the bottom edge.
 - **Millimeters and Centimeters:** Calibrations are on two edges, on one side. Millimeters to centimeters on the top edge and centimeters on the bottom edge.
 - **Cork-Backed Inking Rulers:** Calibrations are on two edges, on one side. Inches in 8ths and 16ths. Since the water-resistant cork backing raises the ruler above the work surface, inking can be done without fear of bleeding or smearing.

Quality Specifications (continued)

- **L-Squares** are universally used tools and come in the following configurations:
 - **Standard L-Squares** are calibrated in inches or centimeters. Each arm is calibrated on two edges on one side and on one edge on the reverse side.
 - **Half-Size L-Squares** are calibrated in inches or centimeters. Each arm is calibrated on one edge on two sides. The Half-Size L-Square is a half scale of our Standard L-Squares.
 - **Mini L-Squares** are calibrated in inches or centimeters. Each arm is calibrated on two edges on one side and one edge on the reverse side. The short arm is also calibrated as a center-finding ruler.
- **Lance® Black Anodized Rulers** are constructed of black, anodized, hardened aluminum, .090" thick and 1" wide. They are designed for use in demanding environments such as machine shops and factories where conditions often prove destructive for rulers of a less hardy construction. The calibrations appear in a sharp contrast of silver against a black background and are able to withstand extensive wear and tear .
- **Specialty Rulers**
 - **Cuff Rulers** are handy accurate tools used to quickly mark trouser cuffs of various lengths and widths. Calibrated in inches, 8ths on top edge and 16ths on the bottom edge.
 - **Center Finding Rulers** are designed as an efficient aid in finding the center between two points. They are a significant time-saving device in pattern-making, tailoring, form design and crafts of all kind. There is a zero-point at the center of the top edge of the ruler, with equal incremental measurements to the left and to the right in 32nds of an inch. The bottom edge is a standard ruler calibrated in 16ths.
 - **Agate / Pica Rulers** are precision tools used in the layout of printed material. Calibrated on two edges, on two sides.
 - Side One: Inches, in 16ths on top edge and Picas on the bottom.
 - Side Two: Inches, in 16ths on top edge and Agates on the bottom.

Lance® Curves

Hip Curves

Product No.	Length	Calibrations
HC-024-LAN	24"	1/8"
HC-060M-LAN	60 cm	1/2 cm

French Curves

Product No.	Length	Calibrations
FC-012-LAN	12"	1/8"
FC-024-LAN	24"	1/8"
FC-032M-LAN	32 cm	1/2 cm
FC-060M-LAN	60 cm	1/2 cm

Lance® T-Squares

Standard T-Squares (Blue Head 9")

Product No.	Length-Width	Calibrations
T-012-LAN	12" x 1-1/2"	1/8", 1/16"
T-015-LAN	15" x 1-1/2"	1/8", 1/16"
T-018-LAN	18" x 1-1/2"	1/8", 1/16"
T-030-LAN	30" x 1-1/2"	1/8", 1/16"

Heavy Duty T-Squares (Green Head 16")

Product No.	Length-Width	Calibrations
HT-024-LAN	24" x 2"	1/8", 1/16"
HT-030-LAN	30" x 2"	1/8", 1/16"
HT-036-LAN	36" x 2"	1/8", 1/16"
HT-042-LAN	42" x 2"	1/8", 1/16"
HT-048-LAN	48" x 2"	1/8", 1/16"

TR-3060-12-LAN	12"	1/16"
TR-3060-14-LAN	14"	1/16"

45°/ 45°/90° Triangles

Product No.	Length	Calibrations
TR-4590-6-LAN	6"	1/16"
TR-4590-8-LAN	8"	1/16"
TR-4590-10-LAN	10"	1/16"
TR-4590-12-LAN	12"	1/16"

Lance® Straight Edge Rulers

Calibrated in Inches

Product No.	Length- Width	Calibrations
SE-006-LAN	6" x 3/4"	1/16", 1/32"
Compressed calibration is necessary on smaller rulers (e.g. SE-006)		
SE-012-LAN	12" x 1"	1/8", 1/16"
SE-015-LAN	15" x 1-1/4"	1/8", 1/16"
SE-018-LAN	18" x 1-1/4"	1/8", 1/16"
SE-024-LAN	24" x 1-1/4"	1/8", 1/16"
SE-036-LAN	36" x 2"	1/8", 1/16"
SE-048-LAN	48" x 2"	1/8", 1/16"
SE-060-LAN	60" x 2"	1/8", 1/16"
SE-072-LAN	72" x 2"	1/8", 1/16"
SE-096-LAN	96" x 2"	1/8", 1/16"

Calibrated in Inches / Centimeters

Product No.	Length-Width	Calibrations
SE-015EM-LAN	15 cm x 1.91 cm	1/32", cm
SE-030EM-LAN	30 cm x 2.54 cm	1/16", cm
SE-060EM-LAN	60 cm x 3.49 cm	1/16", cm
SE-150EM-LAN	150 cm x 3.81 cm	1/16", cm
SE-200EM-LAN	200 cm x 3.81 cm	1/16", cm

Lance® Straight Edge Rulers (continued)

Calibrated in Centimeters

Product No.	Length- Width	Calibrations
SE-030M-LAN	30 cm x 3.8 cm	mm, cm
SE-045M-LAN	45 cm x 3.8 cm	mm, cm
SE-060M-LAN	60 cm x 3.8 cm	mm, cm
SE-100M-LAN	100 cm x 3.8 cm	mm, cm

Cork-Backed Inking Rulers Calibrated in Inches

Product No.	Length-Width	Calibrations
CB-006-LAN	6" x 3/4"	1/16", 1/32"
Compressed calibration is necessary on smaller rulers (e.g. SE-006)		
CB-012-LAN	12" x 1"	1/8", 1/16"
CB-015-LAN	15" x 1-1/2"	1/8", 1/16"
