BAMBOO KNITTING NEEDLES.....

All sizes have tapered tips for easier knitting. Single points, double points and circulars in all lengths and sizes.

Takumi

Our Takumi bamboo knitting needles are eco friendly.

In Japanese "Takumi" means "craftsman"

Tapered tips on all sizes and needle types. Great for lace knitting!

Our high quality begins with the selection of raw materials.

Clover values the feelings of the knitter as we reach perfection in the technology of making knitting needles. Our knitting needles are filled with the thoughtful care of the knitter.

Only the finest bamboo can become "Takumi".

Our high-quality knitting needles are created with the properties of the finest natural bamboo and the long-nurtured Clover manufacturing technique. The more you knit with our "Takumi" needles, the more you'll love knitting.

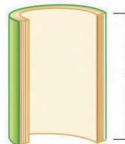

We only use fully matured and properly aged bamboo stock, with adequate density.

The bamboo trees from cold climates are hard and highly resistant to bending, making them most suitable for knitting needles. We choose bamboos from regions with the least snowfall to avoid those stems that have been bent or damaged by the weight of the snow.

Bamboo that becomes "Takumi"

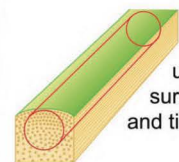

We do not use bamboo nodes (joints) or the pieces, adjacent to nodes because those woody fibers are not straight enough.

We use only bamboo sections between the nodes (internodes) that have adequate density.

We cut and discard the bent portions, shoots and roots of bamboo trees.

In order to make sure that materials do not shrink when they are dried, we use only the portion near the outer surface, where wood fiber texture is firm and tight.

We limit the harvest of Bamboo trees in the winter season.

In the winter, bamboos contain less water, which may cause stains and mold, and their woody fibers are tighter.

We only use portions that are suitable for knitting needles.

We never use bent bamboos or portions near nodes and roots, as these contain bent fiber. Furthermore, we use only the bamboo internal stems that are farthest from the nodes and that have adequate density.

We use the hard portion just under the surface as our source material.

We never use bent bamboos or portions near nodes and roots, as these contain bent fibers.

Furthermore, we use only the inter nodal stems that are farthest from the nodes and have adequate density.

We give them an ultra-smooth finish.

With the proper glide of the yarn, your hands will not feel tired — even after knitting for a long time.

Finished to uniform thickness.

They are finished to accurate specifications to ensure even loops and a beautiful knit finish.

Our easy-knit needle point will not split yarns.

The needle point is rounded by Clover's high technology method.

All sizes have tapered tips for easier knitting. Single points, double points and circulars in all lengths and sizes. All our circulars have soft, flexible cables

Our Takumi bamboo knitting needles are eco friendly.

TIP

Circular Knitting Needles created by the Clover high technology:

All our tips are tapered!
The needle points are ideally shaped by the same Clover proprietary technique used for straight knitting needles.

All our circulars have soft and flexible cords.
The smooth nylon cord glides well and fits easily into your hands.

The needles and the cord are connected so yarn can advance smoothly.
