

# Jiffy® J-2000 Model Steamer

## FEATURES

- Polymer outer housing unit for durability
- Lightweight, flexible hose
- Shatterproof water caddy
- Safety wiring feature temporarily turns the unit off should it accidentally run dry
- Comfortable, easy-to-grip handle
- Removes wrinkles up to five times faster than conventional ironing
- Easy-roll casters for mobility
- Numerous steam head attachments available
- Backed by Jiffy®'s renowned Customer Service--*should your steamer need repair, send it to us and we will repair and ship the unit within 24 hours from its arrival to our plant*

## INCLUDES:

# Jiffy® J-2000 Directions

1. Attach hose firmly with included assembly wrench, which is magnetized and located on the bottom of the unit. Assemble and attach hose hanger rod set. See page 9 for assembly instructions.

Figure 1

2. Invert water caddy filled with distilled or tap water, plug into proper voltage outlet, turn switch to lighted ON position and you will have steam within minutes. Never substitute the Jiffy® Steamer water caddy.

3. For easy operation, mount optional Jiffy® Steamboard to door or wall to hold clothing while steaming (figure #2). For hanging garments without optional Jiffy® Steamboard, simply install an eye screw or nail to inside of a doorway or directly onto a wall or you may use your steamer's rod set as shown in figure 3. Touch material lightly with steaming head and wrinkles will vanish instantly. The combined touch of the steaming head and the direct steam is very important. Some articles can be steamed better from the underneath side. Speed and efficiency is accomplished with a little practice. Always steam with hose in an upright position, so any condensation is free to flow back into steamer. If steaming in a low position near floor, straighten hose up and out frequently to keep clear of condensation. **DO NOT ALLOW STEAMER TO RUN DRY.**

Figure 2

4. Hang steam head in an upright position in the hose hanger section when not in use and turn switch to OFF (figure #3).
5. Periodically, pour old water out of steamer to avoid sediment buildup and maintain proper water level (figure #4). Remove hard water deposits with Jiffy® Liquid Cleaner. Wipe water cup out with a hand towel. See page 28 for complete cleaning instructions.

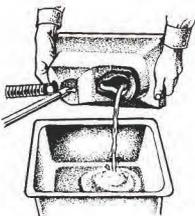

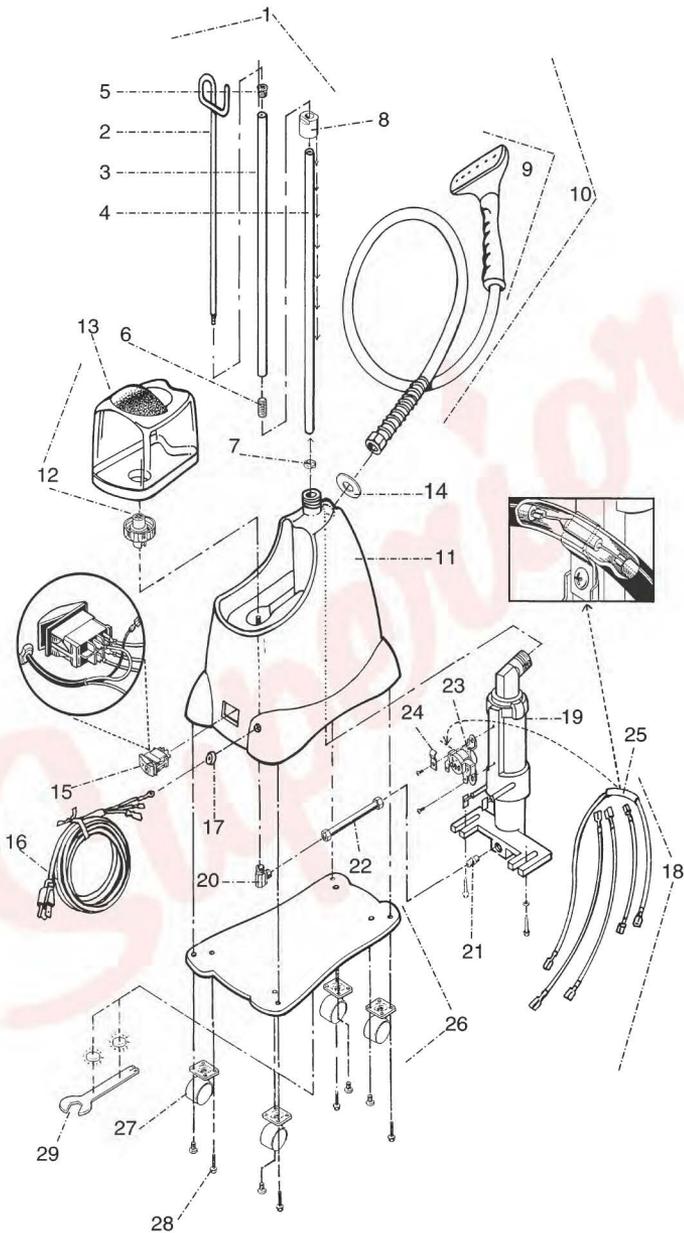

Figure 4

Figure 3

**NOTE:** No two water supplies have the same mineral content. If your steamer begins to cut on and off during normal use, the thermostat is indicating the heating unit needs the sediment cleaned out.

# Jiffy® J-2000 Parts Diagram

Should you ever need replacement parts for your Jiffy® Steamer, you may purchase them separately. Use this handy diagram and parts list to identify any part you may need. Please include model and serial number when ordering.

# Jiffy® J-2000 Wiring Diagram

## Caution:

Insure that the power cord is unplugged from the electrical outlet before attempting to repair your Jiffy® Steamer.

# Jiffy® J-2000 Wiring Instructions

**Please note switch terminal numbers 2, 3, 5 and 6 indicated on the enlarged switch diagram are marked on the actual switch. Jiffy® Steamers manufactured before May 2000 are not marked with the terminal switch numbers, but the terminal blades are in the same location.**

1. Insert cordset into housing and connect white neutral wire from cordset bundle to terminal number 5 on the switch.
2. Connect blue wire from the right side of heating element to the right side of the L-290 thermostat.
3. Insert brass heating unit into housing and tighten with 2 mounting screws. Connect green ground wire (from cordset) to the nearer of the two mounting screws.
4. Connect black positive wire from cordset to plastic connector on orange fusible link wire.
5. Connect other end of orange fusible link to terminal number 2 on the switch.
6. Connect yellow wire from the left side of the thermostat to terminal number 3 on the switch.
7. Connect white wire from the left side of the heater unit to terminal number 6 on switch.
8. Insert one end of copper water line and compression ring into threaded fitting at bottom of brass heating unit and tighten nut with a  $\frac{5}{8}$ " wrench.
9. Connect other end of water line with compression ring to 90 degree brass elbow at bottom of water cup and tighten with a  $\frac{5}{8}$ " wrench. (Heating unit may be loosened and adjusted for a better fit if necessary.)
10. Set steamer upright and place black plastic strain relief approximately  $4\frac{1}{2}$ " from end of cord and insert into housing using pliers.
11. Secure bottom plate with four screws.
12. To avoid leakage, be sure and tighten hose (or hat nozzle) with wrench before using steamer.
