## Commitment to Service & Category Growth

Mundial's uncompromising commitment to quality extends beyond our products to our relationships with our trade partners and our efforts to grow the scissors and shears category through:

- Prompt, responsive customer service and unmatched product availability
- Broad product assortment spanning every price point
- Promotional packs, gift sets and improved packaging for value-added merchandising and display opportunities

**Through a combination of old world craftsmanship and technological innovation, Mundial is setting a new standard of excellence in quality, selection and value.**

## Mundial Out-performs the Competition in Sustained Cutting Efficiency

## Choosing the Right Scissors or Shears for the Job

### Dressmakers' Shears:

- wide range of cutting tasks
- able to cut through fabric of many weights
- designed with bent or offset handles so that whatever is being cut does not have to be lifted off the cutting surface
- ensures the shears do not harm the cutting surface

### Sewing Scissors:

- light to medium cutting tasks such as trimming and clipping seams and loose threads

### Embroidery Scissors:

- light work that entails close detail
- blades are slim and sharp with fine, precise points

### Thread Clips:

- quick snipping and tight seam stitch cutting
- ring fits over the ring or middle finger and the clip rests in the hand
- thumb and index finger work the spring action blades

### Pinking Shears:

- finishing seams with a resistant jagged edge
- prevents the threads in the fabric from coming undone and loose
- decorative appliqué cutting

### Buttonhole Scissors:

- opening buttonholes without stretching or damaging the stitches
- features an adjustable screw so all buttonholes can be cut at an even length

### Appliqué Scissors:

- trimming excess fabric or loose threads in layered applications
- trimming sheer and delicate fabric in lace insertion
- designed with one narrow and one wide blade; wider blade protects the fabric underneath while the narrow blade makes the cut

### Quilting Scissors:

- cut easily through heavy quilting material
- features stainless steel blades with a special knife edge

### Hobby/Craft Scissors:

- detailed cutting of items such as paper, yarn, cloth, thread and other crafting materials

### Pocket/School Scissors:

- commonly used by children for crafts and general cutting
- blunt ends that prevent the point from tearing or ripping

### Multi-Layer Shears:

- cutting through multiple layers of fabric as well as single layers of thicker craft material
- features heavy-duty, extra long, stainless steel blades with a double knife edge

### All Purpose Shears/ Straight Trimmers:

- general purpose; cut anything around the house

### Barber Shears:

- cutting hair
- serrations on one blade for cutting accuracy

### Take-A-Part Shears:

- cutting meats and vegetables, cracking nuts and uncapping bottles
- great for plastic or canvas crafts
- notch can snip small pieces of wood and wire
- take-a-part blades for easy, thorough cleaning

## Care and Use Tips for a Lifetime of Performance

**Properly cared for, quality scissors and shears will last for many years. Here are a few tips on the care and use of Mundial scissors and shears.**

- To clean blades, wipe them after each use with a clean, soft cloth; do not use water.
- Use the right scissors or shears for each job.
- Oil the pivot screw on scissors and shears every few months. Place a drop of oil on the screw, open and close a few times and wipe off excess oil.
- Never force a cut. If scissors cannot complete the cut, stop cutting. Cut heavy materials near the pivot, not near the tips of the blades.
- Cut carefully; hitting metal or plastic objects can cause nicks in the blades, damaging them and minimizing their cutting effectiveness.
- Handle carefully; dropping scissors can knock them out of alignment, reducing cutting accuracy.
- Store in a pouch or wrap in a clean cloth in a safe, dry place to prevent accidents and damage.
- Do not sharpen pinking shears by reworking the zigzag profile of the teeth; a simple edge grinding is sufficient.
- Blades should be sharpened if they do not cut evenly from pivot point to tip. Check Yellow Pages for professional sharpeners.

# Classic Forged

**Mundial Classic Forged Scissors** are made of the finest, hot drop forged and fully-plated carbon steel. Mundial's special Knife Edge technology, available on Classic Forged Dressmakers' Shears, features a precision cut blade that glides through multiple layers of fabric with ease, delivering optimum results.

### Knife Edge Blade

The precision Mundial Knife Edge blade cuts through multiple layers of fabric easily and cleanly to the very tip.

### Micro-Serrated Blade

To hold even the sheerest fabric in place without slipping Mundial pioneered a fine Micro-serrated bottom edge into their blade technology.

### The Stay-Set™ Pivot

Mundial engineered the Stay-Set™ pivot assembly for their Heavy Duty Industrial shears.

Customize the ride on your Mundial shears to your own preference; simply adjust the Stay-Set™ pivot assembly once with a screwdriver, and it stays set for comfortable cutting power.
