INSTRUCTIONS FOR OILING

Use Singer "Manufacturing Sewing Machine Oil (Cloth and Leather)"

To ensure easy running and prevent unnecessary wear of the parts which are in movable contact, the machine requires oiling and when in continuous use it should be oiled and greased at least twice each day. Oil holes are provided for all bearings which cannot be directly reached. Grease should be applied to all gears to keep them thoroughly lubricated. The shuttle should be oiled often enough to keep it thoroughly lubricated.
