INSTRUCTIONS FOR OILING

Oil should be applied to all oil holes and at all places where there are parts in movable contact. When the machine is in continuous use, it should be oiled at least twice each day. The loose pulley at the end of the machine must be oiled frequently through the hole in the center of the large screw head at the end of the shaft.

The shuttle bearing in the shuttle race should be oiled each time a bobbin is replaced.

Use only Singer "Oil for High Speed Sewing Machines (Cloth and Leather)" for general use, or "Stainless Oil for High Speed Sewing Machines" where a stainless oil is desired.
