INSTRUCTIONS FOR ORDERING

In ordering from this list, use ONLY the PART number in the FIRST column.

The number stamped on a Sewing Machine part is in every case the number of the single part only.

Every combination of parts sent out as such has its specific number, which, although not stamped on the parts, must be used when ordering the combination.

Each number always indicates the SAME PART in whatever list it appears, or for whatever machine.

The letters after some of the numbers indicate the style of finish only, as follows:

- A. Hardened, Polished and Plated.
- B. Polished and Plated.
- C. Hardened only.
- D. Polished only.
- E. Soft, not Polished.
- F. Hardened and Polished.
- H. Blued.
- J. Plated only.

These letters MUST BE USED *when* they appear in the list, and AFTER the number *as* in the list.

In this series

1 to 1500 and 50001 to 51500 are Screw Numbers.

1501 to 1800 are Nut Numbers.

1801 to 2000 are Roller Numbers.

2001 to 50000 and 52001 and upward are numbers of Machine Parts.

The figures in the second column refer only to the plates, illustrating the parts, and are NOT TO BE USED in ordering.

Parts marked with an asterisk (*) are furnished only when repairs are made at factory.

This technical drawing illustrates a mechanical assembly, likely a component of a larger machine. The main structure is a rectangular frame (20067) with a central vertical member (4885). A foot-like component (4881) is attached to the central member, featuring a lattice pattern and a hook (4884). The frame is supported by four corner brackets (12242). A horizontal bar (4880) is positioned at the top, with two vertical rods (6337) passing through it. A small component (2770) is attached to the right rod, and a hook (7125) is attached to the left rod. A central component (2763) is also shown. The drawing is labeled with various numbers indicating different parts.
